

## Income Capital Management Announces Strategic Partnership with Bitcashier to Enable Crypto-Based Client Transactions

Prague, April 11, 2025 – **Income Capital Management** is pleased to announce a strategic partnership with **Bitcashier**, a fully regulated European platform for crypto payments and settlement services.

This collaboration allows clients to **deposit and withdraw funds using cryptocurrencies** such as Bitcoin, Ethereum, and stablecoins, which are securely converted into fiat currency and allocated to managed investment portfolios. The entire process is compliant, insured, and completed within 24–48 hours—without clients needing to deal with off-ramping or traditional banking delays.

“This solution enables us to serve crypto-oriented investors while maintaining the high standards of security, transparency, and regulatory compliance that define our investment services,” said **Paolo Volpicelli**, CEO of Income Capital Management.

Through Bitcashier’s platform, all crypto transactions are executed at the best available rates, with secure fiat settlement directly into Income Capital’s bank accounts. The integration bridges the gap between the digital asset economy and professional wealth management.

“With crypto adoption growing among global investors, this partnership creates a seamless entry point from crypto wealth into long-term, regulated investment strategies,” said **Giles Whitby-Smith**, Co-Founder and CEO of Bitcashier. “We are excited to work with Income Capital Management to make this transition secure, fast, and compliant.”

### About Bitcashier

Founded in 2019, **Bitcashier** is a fully regulated and insured fintech platform that enables businesses and individuals to **accept, convert, and settle cryptocurrency payments with ease**. With real-time best execution, deep liquidity, and advanced compliance infrastructure, Bitcashier offers seamless integration between digital and traditional finance.
